Photograph	Report: Description in (min 250 to max 800 words)	The Value Added Course (VAC) on *Human Values and Ethics* is designed to strengthen the ethical, moral, and social foundations of learners by helping them develop a responsible, compassionate, and value-oriented outlook toward life and society. In the contemporary world, rapid technological advancement, increasing competition, and changing social structures have created new ethical challenges in personal, professional, and civic domains. This course provides a reflective space for students to understand the significance of values such as integrity, honesty, empathy, respect, cooperation, and social responsibility, and to relate them to real-life situations. Human values and ethics are essential not only for personal character formation but also for building harmonious relationships, sustaining social cohesion, and promoting sustainable development. Through discussions, case studies, and experiential learning, the course encourages students to critically examine the consequences of human actions, ethical decision-making, and the role of values in shaping individual behavior and collective progress. It also emphasizes the importance of ethical conduct in academic life, workplaces, professional practice, and digital environments. Overall, the course was successful in achieving its objectives.
