REPORT

Event	Webinar
Theme	How to start up and legal & ethical steps
Date	23 April' 2021
Time	12:00 pm to 1:00 pm
Venue	Microsoft team
Dean	Dr.Rashmi Gujrati
Convener	Inderpreet Singh
Resource Person	
1.	Dr. Suplab Podder BBA department, Dayananda Sagar College of Arts, science and Commerce, Bengaluru.

OBJECTIVES

1. To make the participants understand about the legal and ethical issues.
2. To enhance the knowledge and encourage the youngsters to start up their own venture.
3. To make the participants understand about the organizational skills adopted by the young blood to enhance revenue.

WEBINAR

This webinar was intended to train participants about the startups and legal and ethical steps for framework to produce quality results as the new entrepreneurs. The key focal point of the webinar was to identify the tools and techniques used by entrepreneurs to uplift business.

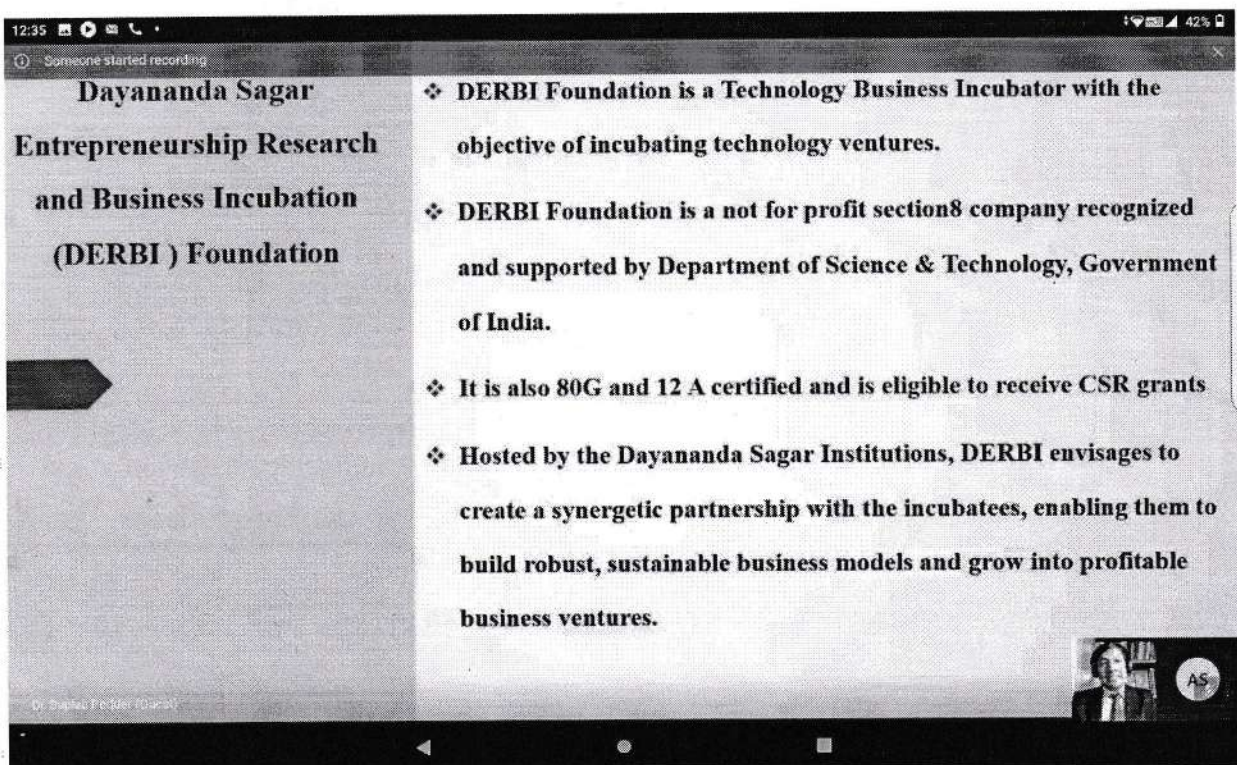

The participants have learnt about the different types of duties they have towards their environment and organization in detail. In workshop complete online guidance was given by resource person.

Resource Person

Dr. SUPLAB PODDER

BBA, department Dayananda Sagar College of Arts, science and Commerce, Bengaluru.

- Dr. Podder gives us a brief introduction about the startups.
- He further informed us that how an individual can start up their own venture.
- . Dr. Podder further informed us about their business incubation foundation.

- He further briefed us about the legal issues faced by the start ups in India.

➤ Licencing and permit issues

The requirement of licenses, permits, and permits may vary from business to business, so before starting a business the person should be aware of the local laws, rules, and regulations. The other issue with respect to licenses is that sometimes it is not much quick and easy to get licenses from the government authorities and it requires a lot of time and money to obtain licenses.

➤ Advertisement and marketing

Advertisement and marketing are very important for any start-up or any other forms of business but advertising false claims, obscene, scandalous, or seditious advertisements may give rise to serious criminal penalties and it may blow away the goodwill and reputation of a firm and for start-ups, such mistakes may be like stepping over a small growing seedling.

12:39 Someone started recording 41%

Licencing and permit issues

❖ The start-ups may require various licenses, permissions, or permits to execute their ideas as due to lack of legal knowledge the start-up may end up paying penalties and may even end up being unethical or illegal.

Dr. Shantanu Patil (GLOBE) AS

This screenshot shows a presentation slide with a title 'Licencing and permit issues' on the left and a bullet point on the right. The bullet point discusses the need for licenses and permits for start-ups and the potential consequences of lack of legal knowledge. The slide is part of a recorded session, as indicated by the 'Someone started recording' notification and the time '12:39'. A small video thumbnail of the speaker is visible in the bottom right corner.

Speaker explained about the advertising and marketing content

➤ Infrastructure related Zonal Laws

The start-up must be aware of the zonal laws; zonal laws are the regulations that deal with the use of land in a particular area. For example – The local municipal authority in an area can pass a law forbidding the use of any property or land for industrial or commercial purposes, as it is a residential area. The zonal authority divides a locality into eight parts which include residential, commercial, industrial, public, and semi-public, public utilities, open areas/parks/playgrounds, transport and communication, agricultural use.

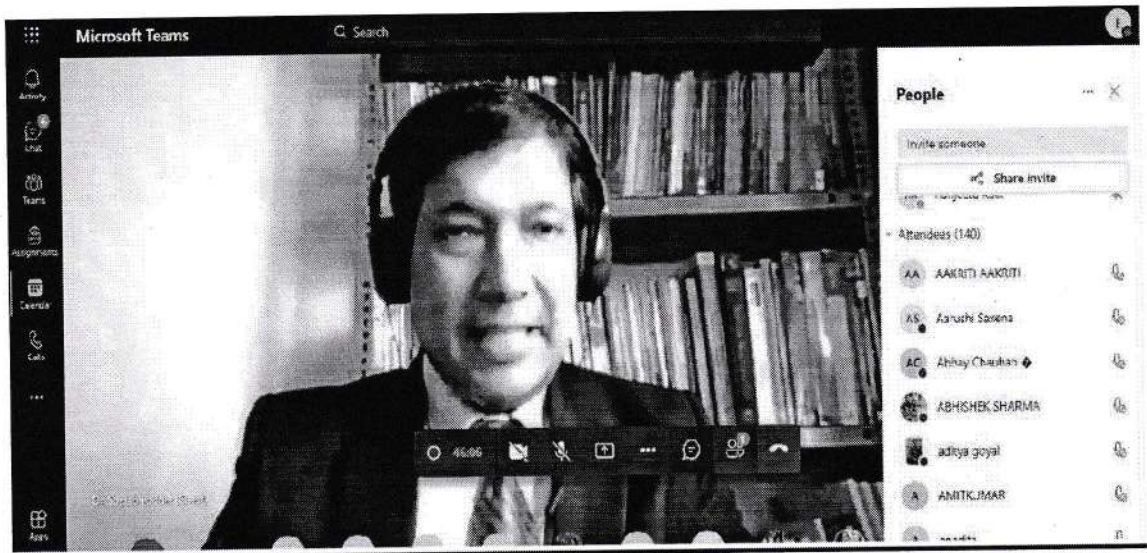

Infrastructure related Zonal Laws

- ❖ Allocation of property for the purpose of the office, warehouse, service center, manufacturing units, etc. is another major challenge for start-ups in India.
- ❖ The start-ups should be aware of local laws regarding the commercial use of agricultural land/ school/ hospital

Content Elaborated by expert

➤ Data Protection and Privacy Issues

The Startups and other e-commerce businesses record and use personal details including the search history. The conclusion of this example is that the start-ups should not access the private details of the users without their permission or they should not ask for the permissions which are not needed by their website or application. The start-ups should give importance to the privacy of the users

Speaker Session in Webinar

➤ Protection of Intellectual property rights

Intellectual property rights are like the heart and soul of any start-up. Many start-ups face a common fear that their idea or plan could be stolen by someone so it is important for a start-up to protect their intellectual property rights on a priority basis. And the other issue is that the start-up should also check that what they are planning to do or what they are planning to sell is already been protected.

Protection of Intellectual property rights

- ❖ Start-ups should seek to protect the following intellectual property rights, Patents, Copyright, Trademark, Servicemark, Trade Secrets and Confidentiality Agreements, Contract Management, Employment Contracts

Speaker elucidated about the topic

➤ The problem is determining the business structure

Many start-ups face problem in determining what is an ideal business structure for their start-up as the business structure may vary from business to business and one business structure could be good for one may be bad for the other in terms of risk, a number of people involved, sharing of profits, liability, taxation, annual meetings, and registration, etc. The business structure of a start-up may be in the form of partnership, sole proprietorship, private limited business or LLP, etc.

The problem is determining the business structure

❖ Many start-ups face problem in determining what is an ideal business structure for their start-up as the business structure may vary from business to business and one business structure could be good for one may be bad for the other in terms of risk, a number of people involved, sharing of profits, liability, taxation, annual meetings, and registration, etc.

speaker elaborated about the business structure

- Dr. Podder further informed us about the legal and ethical duties towards the organisation and the society.

The purpose of a start-up is to earn profit but while earning profit ethics should not be ignored. The start-ups should comply with the laws and regulations and at the same time, it should not forget their duty towards the community, people, customers, and the company.

➤ Duties towards the customer

1. Duties towards the customers

❖ The start-ups should not indulge in any kind of activity which may be detrimental to the interest of the customers, the start-ups should accept the feedback from the customers and should take care of the after-sale services and assist the customers.

➤ Duties towards the employees

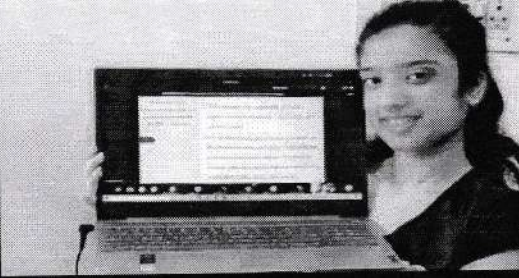

2. Duties towards the employees

❖ The employees for a start-up are as important as wheels for a car, be it a small or big employee everyone's contribution is necessary for the proper growth and functioning of a start-up. The start-up should be legally as well as ethically give regard to the rights of the employees.

➤ Duties towards the community

4. Duties towards the community

- ❖ The Startups should be careful that they should not in any manner cause harm to the sentiments of the people and they must follow a proper pathway for the betterment of the society by keeping provisions of investing in social causes like education, food, environment, etc.
- ❖ Start-ups should be careful about the religious sentiments of the people, especially while advertising

➤ Duties towards the environment

3. Duties towards the environment

- ❖ The Startups should be careful that they obtain all the legal certificates, permissions, and permits from the government bodies and they should not involve in any activity which may have a negative impact on the environment.
