About Conference:

The goal of the National Conference on Computing Informatics, Networks & Security is to bring together academics, scholars, and developers under one roof to share knowledge, experiences, and research findings in order to advance science and technology as a whole. Its goal is to promote the creation and application of innovative methods, tools, and techniques for the design, development, and implementation of various technological systems from all specialized and multidisciplinary domains through study and practice. The conference gives everyone the chance to expand network, discuss ideas, and present research to a global audience. Discussions about the most recent breakthroughs, trends, and other difficulties and concerns are also welcome.
