

2.3.2 - Teachers use ICT enabled tools for effective teaching-learning process.

Additional Information

The Information and Communication Technologies (ICT) tools used in the classroom has add-on facilities like, the institute has added Teleprompter which help to enhance the capability of digital studio and a device used to project a speaker's script on to a transparent panel in front of a television camera lens in such a way that the text remains hidden from the camera. The faculty members extensively use ICT enabled tools for the teaching-learning process. To enable this, the Institute has created a state-of-the-art infrastructure. There are smart classrooms and seminar halls with Multimedia Projection, Desktop PC , WiFi and equipped with Virtual Teaching/ Learning aids that can facilitate online streaming of lectures making hybrid mode of instructions possible.

ICT has invaded and transformed many aspects of our lives to the extent that we live in an environment that is dominated by technology which itself is consumer driven. It has trained all of us in the extensive use of ICT enabled tools for effective teaching and learning processes. In the modern world, personal development is not limited to classroom learning. The departments hold a variety of online lectures, students can continue to learn online, and do a lot of homework to maintain the agility of knowledge. Various webinars from industry experts and well-known experts were held to enable students to understand the development of the industry and its requirements. Various methods of online communication are used to share class notes, assignments and lectures with students. In this session, we have incorporated gigabit switch to provide the seamless connectivity all around the campus.
