REPORT : FDP ON RESEARCH METHODOLOGY & DATA ANALYSIS

Title of Activity*	FDP on Research Methodology & Data Analysis
Values	To develop deeper understanding of Research and Analysis.
Learning Outcomes	• Awareness of research concepts and methods. • Select the appropriate statistical method for the various study topics. • Use statistical software to analyze data using both basic and advanced statistical approaches. • Analyze output tables, interpret them, and write up the results for publication.
Organized by (Dept./ Centre/ Cells/Clubs/ Committees Name)*	Department of Management Sciences
Program Theme*	Research Methodology
External Expert / Internal Expert	Dr B. B. Tiwari

Date*	23rd – 30th March 2023																												
Time*	3.00 – 5.00 pm (Hybrid Mode)

Report: Description in (min 250 to max 800 words)*

Report of the Session: Research is the methodical, unbiased process of obtaining, logging, and analysing data in order to make appropriate and significant conclusions. It suggests thorough inquiry and a commitment to science, where the researcher examines the facts more carefully in order to learn everything that can be learned about the topic at hand. Management decision-making is facilitated and uncertainty is decreased by applied research. One needs to be well-versed in the most recent advancements in research methods to keep up with recent advancements in any area. The Workshop on Research Methodology & Data Analysis will explore the fundamental aspects of research and the consequent need for participants to rethink the assumptions that underlie historical paradigms of research in the field of management while keeping in mind the significance of research methodology. The goal of the course is to give participants a practical way to do research.

Participants are likely to leave the workshop with the knowledge and abilities needed to examine the literature, formulate hypotheses, frame research designs, recognise sample procedures, and understand the function and significance of data gathering and analysis tools. The participants will be exposed to some brief theoretical and practical inputs during the seven-day session. The participants are required to bring their research problem and data if they need to work on them during the workshop. At the conclusion, they will do independent data analysis and present their findings to the class. Objective of the Session:

- To provide an overview of Contemporary Research Methodology & Review of Literature.
- To provide the platform for discussion on the methodological requirements of research and to simulate & capture new approaches.
- To enable researchers, irrespective of their discipline, in developing the most appropriate methodology for their research studies.
- To make them familiar with the art of using different research methods and techniques.
- To provide the platform for discussion on the statistical requirements of the research.
- To train and inculcate the skills for Data Analytics.
- To guide participants for Publishable Technical Writings (including Research Ethics)

We are enough fortunate to have the participants from following Organizations in our FDP. This is proud moment for our esteemed organization TIAS-

This FDP was intended to train participants with the different libraries of Python. The FDP was very well-organized and informative. The instructor was clear and concise in his explanations, and he was always available to answer questions.

- ER P.C. Pandey briefed us about the Python. He explained Python is a powerful and versatile language that can be used for a wide variety of tasks.
- Python is easy to learn and use, even for experienced programmers.
- There is a large and active community of Python developers who are always willing to help.
- Python is a great choice for web development, data science, and machine learning.

His teaching style was clear and engaging. He was able to explain complex concepts in a way that was easy to understand. He also made sure to provide plenty of opportunities for hands-on practice.

A significant portion of the FDP was dedicated to real-world problem solving. The resource person presented a variety of case studies that showed how Python could be used to solve real-world problems.

The FDP also included a number of hands-on exercises. Participants were given the opportunity to apply the concepts they learned to real-world problems.

The FDP was attended by 12 participants

	from different backgrounds. ER P.C. Pandey covered a wide range of topics in the FDP, including: • Introduction to Python • Data types and variables • Operators and expressions • Control flow statements • Functions • Modules • Object-oriented programming • Web development • Data science • Machine learning The FDP on Python Programming Real Life Problem Solver was a valuable learning experience for participants. They learned the basics of Python programming and how to apply it to real-world problems. They also gained confidence in their ability to use Python to solve problems.
Resource Person Profile	• The resource person of FDP was ER. P.C. Pandey, who is IT Head of CQS. He has Expertise in a variety of IT domains, including software development, system administration, and networking.

Report: Description in (min 250 to max 800 words)*

Report of the Session: Research is the methodical, unbiased process of obtaining, logging, and analysing data in order to make appropriate and significant conclusions. It suggests thorough inquiry and a commitment to science, where the researcher examines the facts more carefully in order to learn everything that can be learned about the topic at hand. Management decision-making is facilitated and uncertainty is decreased by applied research. One needs to be well-versed in the most recent advancements in research methods to keep up with recent advancements in any area. The Workshop on Research Methodology & Data Analysis will explore the fundamental aspects of research and the consequent need for participants to rethink the assumptions that underlie historical paradigms of research in the field of management while keeping in mind the significance of research methodology. The goal of the course is to give participants a practical way to do research.

Participants are likely to leave the workshop with the knowledge and abilities needed to examine the literature, formulate hypotheses, frame research designs, recognise sample procedures, and understand the function and significance of data gathering and analysis tools. The participants will be exposed to some brief theoretical and practical inputs during the seven-day session. The participants are required to bring their research problem and data if they need to work on them during the workshop. At the conclusion, they will do independent data analysis and present their findings to the class. Objective of the Session:

- To provide an overview of Contemporary Research Methodology & Review of Literature.
- To provide the platform for discussion on the methodological requirements of research and to simulate & capture new approaches.
- To enable researchers, irrespective of their discipline, in developing the most appropriate methodology for their research studies.
- To make them familiar with the art of using different research methods and techniques.
- To provide the platform for discussion on the statistical requirements of the research.
- To train and inculcate the skills for Data Analytics.
- To guide participants for Publishable Technical Writings (including Research Ethics)

We are enough fortunate to have the participants from following Organizations in our FDP. This is proud moment for our esteemed organization TIAS-

This FDP was intended to train participants with the different libraries of Python. The FDP was very well-organized and informative. The instructor was clear and concise in his explanations, and he was always available to answer questions.

- ER P.C. Pandey briefed us about the Python. He explained Python is a powerful and versatile language that can be used for a wide variety of tasks.
- Python is easy to learn and use, even for experienced programmers.
- There is a large and active community of Python developers who are always willing to help.
- Python is a great choice for web development, data science, and machine learning.

His teaching style was clear and engaging. He was able to explain complex concepts in a way that was easy to understand. He also made sure to provide plenty of opportunities for hands-on practice.

A significant portion of the FDP was dedicated to real-world problem solving. The resource person presented a variety of case studies that showed how Python could be used to solve real-world problems.

The FDP also included a number of hands-on exercises. Participants were given the opportunity to apply the concepts they learned to real-world problems.

The FDP was attended by 12 participants

	from different backgrounds. ER P.C. Pandey covered a wide range of topics in the FDP, including: • Introduction to Python • Data types and variables • Operators and expressions • Control flow statements • Functions • Modules • Object-oriented programming • Web development • Data science • Machine learning The FDP on Python Programming Real Life Problem Solver was a valuable learning experience for participants. They learned the basics of Python programming and how to apply it to real-world problems. They also gained confidence in their ability to use Python to solve problems.
Resource Person Profile	• The resource person of FDP was ER. P.C. Pandey, who is IT Head of CQS. He has Expertise in a variety of IT domains, including software development, system administration, and networking.
