CULTURAL CLUB

Report on Stage Play

Title of Activity*	Stage play on awareness of environment
Values	<ul style="list-style-type: none"> • Creativity: Inspiring participants to use street theater as a medium to convey important environmental issues and advocate for change. • Empathy: Encouraging understanding of the impact of environmental degradation on marginalized communities and wildlife. • Awareness: Raising awareness about sustainable practices, climate change, and the importance of protecting the environment for future generations.
Learning Outcomes	<ul style="list-style-type: none"> • Environmental Responsibility: Participants will develop an understanding of pressing environmental issues like pollution, deforestation, and climate change, and their responsibilities as global citizens. • Performance Skills: Participants will improve their ability to deliver impactful messages through dramatic expression, enhancing their public speaking and acting abilities. • Collaboration: Participants will learn the value of teamwork in organizing a seamless, thought-provoking performance.
Objectives	<p>* Spread Environmental Awareness: Educate students on the effects of environmental degradation and the role they can play in mitigating it.</p> <p>* Promote Sustainable Practices: Encourage the adoption of eco-friendly habits like recycling, reducing plastic use, and conserving water.</p>

Report: Description in (min 250 to max 800 words)*

The performance commenced at noon, setting the stage for an engaging showcase of theatrical skill and environmental activism. Through the use of street theater, the students illustrated the devastating consequences of human negligence towards nature, focusing on topics such as pollution, deforestation, and the alarming rate of climate change.

The MonoAct was divided into three compelling acts

1. Scenario 1: The play opened with a depiction of a city drowning in plastic waste, showing how everyday choices like using single-use plastics contribute to large-scale environmental destruction. This act highlighted the convenience versus consequence debate surrounding waste management.
2. Scenario 2: The second skit centered around a forest being cut down for urban development, emphasizing the loss of biodiversity and the displacement of indigenous communities that rely on the forest. The portrayal underscored the emotional and ecological impacts of deforestation.
3. Scenario 3: The final act offered a glimmer of hope by demonstrating how collective action—such as reforestation efforts and reduced consumption—can restore balance to nature. This uplifting performance called on students to become environmental stewards and advocates for change.

The performance was followed by an interactive discussion where the audience, made up of students and faculty, reflected on their own habits and shared ideas for promoting environmental sustainability. The performers emphasized that even small, individual efforts can contribute to significant environmental improvements when done collectively.

The event did more than just entertain; it educated and empowered students to take action. The audience left with a renewed sense of responsibility toward the environment and a clearer understanding of the pressing need for immediate, sustainable change.
