## Report on the Event of "E- Waste Management Drive"

<b>Title of Activity*</b>	<b>E-Waste Management</b>
<b>Values</b>	<p><b>Reducing Green House Gas Emissions</b></p> <p><b>Reduce waste</b></p> <p><b>Compliance With Regulations</b></p>
<b>Learning Outcomes</b>	<ol style="list-style-type: none"> <li>1. <b>Environmental Awareness:</b> Participants gained a clear understanding of the environmental and health hazards associated with improper disposal of electronic waste.</li> <li>2. <b>Knowledge of E-Waste Types:</b> Students and attendees learned to identify different types of e-waste (e.g., batteries, mobile phones, circuit boards) and their recyclable components.</li> <li>3. <b>Understanding Recycling Processes:</b> Attendees learned how e-waste is collected, segregated, and processed by certified recyclers in an environmentally safe manner.</li> <li>4. <b>Promotion of Responsible Consumer Habits:</b> The drive encouraged participants to adopt sustainable habits such as repairing electronics, buying energy-efficient devices, and minimizing unnecessary upgrades.</li> <li>5. <b>Civic and Social Responsibility:</b> Students developed a sense of responsibility towards community welfare and environmental protection through active participation in the collection and awareness activities.</li> <li>6. <b>Teamwork and Event Organization Skills:</b> Volunteers and organizers enhanced their teamwork, communication, and event coordination skills during the planning and execution of the drive.</li> <li>7. <b>Policy and Legal Understanding:</b> Participants were introduced to existing e-waste management rules and regulations in</li> </ol>

	<p>their country, including the role of producers and consumers in ensuring compliance.</p> <p>8. <b>Lifelong Environmental Values:</b> The drive fostered long-term values such as environmental stewardship, ethical technology use, and conscious consumption.</p>

<p><b>Report: Description in (min 250 to max 800 words) *</b></p>	<p>With the world becoming increasingly dependent on electronic gadgets, the amount of e-waste generated has reached alarming levels. Discarded phones, broken chargers, old laptops, and other outdated electronics often end up in landfills, leaking toxic substances that harm both human health and the environment. Recognizing this growing issue, the drive focused on educating the public and providing a safe channel for e-waste disposal.</p> <p>The event kicked off with an awareness campaign featuring posters, digital outreach, and community engagement activities. Volunteers spoke to students and residents about the dangers of e-waste and the importance of recycling it through proper channels. A workshop led by environmental experts further enriched the initiative, explaining how heavy metals in e-waste can contaminate soil and water, while also offering practical tips on reducing electronic consumption.</p> <p><b>“This drive was not just about collecting e-waste; it was about changing mindsets”</b></p> <p>The success of the E-Waste Management Drive reflects a growing awareness and willingness among individuals to be part of the solution.</p> <p>In a world driven by technology, it is crucial to remember that responsibility doesn’t end when a gadget stops working. Initiatives like this drive serve as a reminder that every step toward sustainability counts – and that change begins with us.</p>
