Report on Herbal Garden: A Green Revolution	
Title of Activity*	Herbal Garden: A Green Revolution
Mulya Parvah	Sustainability, Belongingness, Harmony
Learning Outcomes	<p>Environmental Awareness: Through tree plantation drives, individuals learn about the importance of trees in the ecosystem, the benefits they provide, and the role they play in environmental sustainability. This increased awareness can lead to a greater appreciation for nature and a sense of responsibility towards protecting the environment.</p> <p>Teamwork and Collaboration: Participating in tree plantation drives often involves working in teams to plan, organize, and carry out the planting process. This fosters skills in communication, cooperation, and collaboration, as individuals come together to achieve a common goal.</p> <p>Practical Skills: Tree plantation drives provide hands-on experience in planting and caring for trees. Participants learn about the proper techniques for planting, watering, and maintaining trees, which can be valuable skills for future environmental initiatives.</p>

	<p>Community Engagement: Tree plantation drives bring communities together and create a sense of shared responsibility for environmental stewardship. Participants learn the importance of community involvement in addressing environmental challenges and the power of collective action.</p>

Report: Description in (min 250 to max 800 words) *

On 18th January 2025, the Eco Club of Tecnia Institute of Advanced Studies (TIAS) organized an innovative and insightful event titled "Herbal Garden: A Green Revolution" at the TIAS campus in Delhi. The initiative aimed to promote environmental sustainability and healthy living by encouraging the cultivation of herbal plants, which not only enhance biodiversity but also offer medicinal and nutritional benefits. This event aligned with the Eco Club's continuous efforts to educate the campus community on eco-friendly practices and their role in fostering a greener and healthier planet.

The core activity of the event was the planting of various medicinal herbs in designated sections of the campus. These included:

- **Tulsi (Holy Basil):** Known for its medicinal properties in treating cold and respiratory issues.
- **Aloe Vera:** Used for its healing and skincare benefits.
- **Mint:** Famous for its cooling and digestive properties.
- **Lemongrass:** Known for its aromatic fragrance and health benefits, including anti-inflammatory properties.
- **Lavender:** Valued for its soothing and stress-relieving qualities.

The "Herbal Garden: A Green Revolution" event organized by the Eco Club of Tecnia Institute of Advanced Studies was a highly successful initiative, bringing together the campus community to promote environmental sustainability, health, and well-being. The event not only resulted in the creation of a beautiful herbal garden but also sparked a

	<p>greater interest in herbal medicine and sustainable gardening practices. The Eco Club looks forward to continuing such initiatives, fostering a culture of environmental consciousness and wellness among students and the wider community.</p>
