Report on Bee Friendly Action Day	
Title of Activity*	Bee Friendly Action Day
Mulya Parvah	Sustainability, Belongingness, Harmony
Learning Outcomes	<p>Environmental Awareness: Through tree plantation drives, individuals learn about the importance of trees in the ecosystem, the benefits they provide, and the role they play in environmental sustainability. This increased awareness can lead to a greater appreciation for nature and a sense of responsibility towards protecting the environment.</p> <p>Teamwork and Collaboration: Participating in tree plantation drives often involves working in teams to plan, organize, and carry out the planting process. This fosters skills in communication, cooperation, and collaboration, as individuals come together to achieve a common goal.</p> <p>Practical Skills: Tree plantation drives provide hands-on experience in planting and caring for trees. Participants learn about the proper techniques for planting, watering, and maintaining trees, which can be valuable skills for future environmental initiatives.</p>

	<p>Community Engagement: Tree plantation drives bring communities together and create a sense of shared responsibility for environmental stewardship. Participants learn the importance of community involvement in addressing environmental challenges and the power of collective action.</p>

Report: Description in (min 250 to max 800 words) *

On 4th March 2025, the Eco Club of Tecnia Institute of Advanced Studies (TIAS) organized a **Bee Friendly Action Day** at the District Park, Rohini, Delhi. The event aimed to raise awareness about the crucial role that bees play in maintaining biodiversity, pollination, and food security. This initiative was part of the Eco Club's ongoing efforts to highlight environmental issues, with a particular focus on the declining population of pollinators like bees and the importance of protecting them for the health of ecosystems and agriculture.

The event began with a brief introductory

	<p>session by the coordinator of the Eco Club, who discussed the critical role of bees in pollination and the ecosystem. This was followed by a short presentation on the various species of bees, their behavior, and the current challenges they face due to human activities.</p> <p>One of the central activities was the creation of a bee-friendly garden at the District Park. Volunteers worked together to plant a variety of native flowering plants that attract bees, such as lavender, marigold, sunflower, and bee balm. These plants were specifically chosen for their ability to provide bees with nectar and pollen, which are essential for their survival.</p> <p>Bee Action Day organized by the Eco Club of Tecnia Institute of Advanced Studies was a highly successful and informative event. The activities not only engaged participants in hands-on conservation efforts but also provided them with the knowledge and tools to contribute to bee protection in their communities. The event highlighted the importance of taking action to safeguard the future of bees and other pollinators, which are essential for biodiversity and global food security.</p> <p>The Eco Club looks forward to continuing these initiatives, encouraging the TIAS community and beyond to take proactive steps in environmental conservation and pollinator protection.</p>
Recourse Person Profile	NA
