Students enthusiastically engaged in group discussion.

Report: Description in (min 250 to max 800 words)*

The ELC Club of Tecnia Institute of Advanced Studies organized an insightful session on “Online Voting: The Way Forward or Opening a Potential Pandora’s Box?” on 10th August 2024, at 12:30 PM in Room No. 1409. The session delved into the contemporary topic of online voting, addressing its advantages, challenges, and implications for the future of elections. The event featured a detailed discussion on the potential of online voting in revolutionizing the electoral process. Experts presented the

	<p>view that online voting could lead to greater accessibility and participation in elections, especially for individuals who face barriers such as geographical location, physical disabilities, or busy schedules. Additionally, the ease and speed of voting online were highlighted as major factors that could improve voter turnout and efficiency. However, the session also shed light on the concerns surrounding online voting. The experts raised significant issues such as security, data privacy, and the risk of fraud or manipulation. The potential for cyberattacks and the lack of trust in digital platforms were identified as major barriers to adopting online voting on a large scale. Moreover, the digital divide, which could exclude certain segments of the population from accessing online voting platforms, was also pointed out as a critical challenge. The session concluded with a thought-provoking debate on whether the convenience of online voting outweighs the risks involved. While the future of online voting holds promise, it was agreed that extensive research, robust security measures, and public confidence in the system would be crucial for its successful implementation. Overall, the session provided a comprehensive overview of online voting, raising important questions about its viability and the potential risks it could pose to the integrity of elections.</p>
