Report on Awareness on Sanitation

Title of Activity	Inclusion of water and sanitation issues in Gram Panchayat Development Plan (GPDP)
Activity Type	Outreach Activity
Values	<ul style="list-style-type: none"> • Adequate Sanitation Facilities, • Sustainable Management of Water Resources, • Improved Hygiene Practices
Objectives	<ul style="list-style-type: none"> • Increase knowledge on the importance of proper sanitation and its direct impact on health and the environment. • Encourage regular hand washing, safe waste disposal, and overall hygiene to reduce disease transmission. • Highlight the risks associated with poor sanitation, such as waterborne diseases and environmental contamination. • Empower local communities to take proactive steps in maintaining and improving sanitation standards.
Learning Outcomes	Sanitation awareness teaches learners about the importance of personal hygiene practices such as hand washing, proper toilet usage, and regular bathing. By adopting these habits, learners can reduce the risk of contracting infections and diseases.

Report:

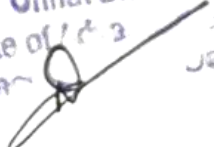

On 16-09-24, a comprehensive research initiative was conducted at Bhalwa Dairy to evaluate IAwareness on Sanitation on Social Issues. The study, undertaken by a dedicated researcher in collaboration with students from Tecnia Institute of Advanced Studies, aimed to assess the current levels of sanitation awareness and its impact on community health and social well-being. In today’s evolving social landscape, sanitation remains a critical concern, influencing public health, environmental sustainability, and socio-economic development. The research focused on identifying gaps in knowledge and practice regarding hygiene and waste management, particularly within vulnerable segments of society.

The participatory approach engaged students in field surveys, interactive workshops, and community outreach programs, fostering a hands-on learning environment. These activities facilitated dialogue between researchers, students, and community members, thereby reinforcing the importance of sustainable sanitation practices. Key findings revealed that improved sanitation awareness directly correlates with better health outcomes and enhanced community resilience. The study also highlighted the need for integrating practical sanitation education into academic

	<p>curricula and public policy frameworks.</p> <p>Recommendations from the research include the implementation of targeted awareness campaigns, enhanced training for local health workers, and the establishment of community monitoring committees to oversee sanitation practices. Overall, the initiative not only enriched academic perspectives but also contributed to tangible improvements in local sanitation standards. This collaborative effort underscores the transformative potential of informed community engagement in addressing critical social issues. These findings provide a foundation for future studies and community initiatives, ensuring that sanitation awareness continues to evolve and positively impact society remarkably..</p>
