**General Ability Test (GTA):** Students appearing for the online assessment round in the computer lab as part of the recruitment process.

**Waiting Area:** Students waiting for their turn with documents and forms before the next stage of the placement process.

**Interview Round:** Recruiters from participating companies conducting a face-to-face interview with a student during the campus placement drive.

**Report: Description in (min 250 to max 800 words)\***

### **Accenture**

Another organization that participated in the Campus Placement Drive organized by the **Training and Placement Cell** of Tecnia Institute of Advanced Studies was Accenture. The company is known for providing IT support, business process services, and technical assistance solutions to various clients. Their participation in the recruitment drive offered students an opportunity to explore career options in the technical support and service management domain.

The recruitment process began with a **General Ability Test (GAT)** designed to assess candidates' aptitude, communication ability, and technical understanding. After the test, shortlisted students were considered for roles such as Desktop Support Engineer and Service Desk Analyst. These positions involve assisting users with system-related issues, maintaining computer networks, troubleshooting hardware and software problems, and ensuring efficient IT service delivery within organizations.

Students from the **BCA and MCA final year** batches participated enthusiastically in the recruitment process. The representatives from Accenture explained the company's work culture, expectations from fresh graduates, and the importance of professional communication, teamwork, and problem-solving skills in technical support roles.

The campus drive served as a valuable platform for students to interact directly with industry professionals and understand real-world job requirements. The participation of Accenture strengthened the collaboration between the institute and industry partners, while also helping students gain confidence and practical exposure to corporate hiring procedures. Such initiatives by the Training and Placement Cell play an important role in preparing students for successful careers in the IT and service sector.

**Recourse Person Profile**

**DIVYA SHARMA (TRAINING AND PLACEMENTS)**

NEETU KUMARI(PLACEMENT OFFICER)

MANISH KUMAR(CENTRE DIRECTOR)

The campus placement drive organized by the **Training and Placement Cell** of Tecnia Institute of Advanced Studies was a valuable opportunity for students to interact with reputed organizations such as Accenture . While the event was successful in providing employment opportunities and industry exposure to students, there are a few areas where improvements can further enhance the effectiveness of future placement drives.

One of the key areas of improvement is pre-placement preparation for students. Some students lacked confidence in communication and interview skills, which are essential for roles such as Technical Support and Service Desk positions. Organizing more mock interviews, aptitude practice sessions, and communication skill workshops before the placement drive could help students perform better during recruitment processes

Another area that can be improved is awareness and information sharing about participating companies. Providing detailed information about company profiles, job roles, and required skills beforehand would help students prepare more effectively and understand employer expectations.

Additionally, time management and coordination during the placement process can be enhanced. Clear scheduling of test rounds, interviews, and announcements would make the recruitment process smoother and reduce waiting time for students.

### Areas of Improvement

### Suggestion from Training & Placement Cell

To make future placement drives more productive and beneficial for students, the **Training and Placement Cell** of Tecnia Institute of Advanced Studies can consider

implementing several improvements and strategies.

Firstly, the cell can organize regular training programs and industry-oriented workshops to prepare students for technical support, IT services, and other professional roles. Sessions on communication skills, problem-solving, resume building, and interview techniques would significantly improve students' employability.

Secondly, the institute can work on strengthening its industry connections by inviting more companies from different sectors such as IT services, data analytics, software development, and cybersecurity. This would provide students with a wider range of career opportunities and exposure to different industries.

Another important suggestion is to introduce internship programs and industry projects in collaboration with companies. Such initiatives would allow students to gain practical experience before entering the job market and make them better prepared for recruitment processes.

Finally, the Training and Placement Cell should continue to collect feedback from both recruiters and students after every placement drive. This feedback can be used to identify gaps, improve planning, and ensure that future campus recruitment events are even more efficient and beneficial for all participants.
